

hMessage

Ready for a web based communication tool that's HIPAA-compliant?

hMessage consists of two HIPAA-compliant ways to send and receive medical correspondence between you and your referral network.

Private Messaging is used when you're trying to communicate with one or more specific people.

Office Messaging is used when you're communicating between your office and another office. Use it for medical records requests, referrals & orders, progress notes, Rx refills, and other correspondence!

hMessage is completely FREE & UNLIMITED between all organizations in our network!
