

# hPrint

Publish documents straight to hMessage, hFax, hCloud or directly into your EHR!

hPrint is a secure print-driver that allows you to electronically capture and publish anything that can be printed or faxed! You will no longer have to print a document, just to turn around and scan it back in!

Choose to electronically print documents directly to your EHR or attach them to your patient's chart on hCloud! Also, with hPrint, you have the option to send medical correspondence to anybody, anywhere.

Want to send medical correspondence securely with a full audit trail? Ask us how!
